Description:

Please send resume to rao@technosmarts.com

This individual will install, support, maintain, and troubleshoot issues in all environment types, primarily on Unix platforms (HP, Sun, Linux). We are looking for a self starter that has the ability to work as a team player with full direction as well as provide individual contributions with little or no direction.

Responsibilities:

- * Create and maintain the most appropriate and efficient structure for the account*s environment.
- * Create and maintain all environment types so that they will fit the account/project requirements at each phase of the life cycle.
- * Create useful tools for both testing and integration teams to improve work efficiency.
- * Install, support, maintain and troubleshoot issues in test/production environments.
- * Provide professional support and consulting to developers and customers in environment area.
- * Technical infrastructure support for the Application teams on site troubleshooting of infrastructure, environment problems.
- * Provide on-call support.
- * Evening, weekend, and holiday support required.
- * Occasional travel.

Preferences:

- * Knowledge of prepaid/postpaid/data billing processes.
- * Knowledge of scheduling software Tivoli/Control-M.
- * Knowledge of distributed environments and HA.
- * Weblogic server administration experience.
- * Reverse engineering skills.
- * Experience working in a service oriented environment.

Requirements:

- * 3-5 yrs advanced user level knowledge of UNIX/Linux and one of their shells (SH/KSH/TCSH/BASH).
- * 3-5 yrs strong user level knowledge of SQL
- * Proven ability to create technical documentation.
- * Bachelor degree in computer science or related field or equivalent experience.
