**Description:**

**Job Title: Software Tester**

Join us & we are a culturally diverse global company looking for a Sr. Analyst or SME located in either Dallas TX or Chesterfield MO.

This position is to support LightSpeed testing in defect analysis. The requirement is for strong individuals that will work directly with the customer and evaluate and route all Critical Defects that are opened during testing. The team will perform initial analysis, validate whether a defect is actually a legitimate defect and determine where the defect should be assigned. This includes analysis of both application functionality as well as the environment/configuration.

**Glimpse of Responsibilities and Abilities**

- Part of testing operation
- Provide 24x7 supports to the testing effort, supported via various shifts utilizing both onshore/offshore resources.
- Trouble shoot defects, and provide a quick assessment.
- Guide testers and defect managers as needed.
- Review test plans.
- Provide support to Testing team
- Analyze and assess defects (both functional and environment-related)
- Guide the testers and resolve execution issues
- Review test plans for accuracy
- Provide resolution for issues that arise during testing
- Guide defect managers in defect resolution

**Requirements**

- In depth understanding of Telecom products (at least one) either from an application functionality standpoint from an environment/infrastructure standpoint both
- Excellent communication skills
- Customer facing experience
- Strong business analysis skills
- Strong problem-solving skills
- Proactive self-starter
- Lightspeed solution knowledge
- Technical / Development / Implementation / Testing background
- Hands-on experience in trouble shooting and test support
- The position is in Dallas or Chesterfield.
- For the long-term, minimal to no travel is needed, however there may be some initial travel required during the ramp-up period.
