Description:

Searching for a Business Intelligence Systems Developer/Analyst with at least three years of experience creating and supporting data warehouses for SAP using SAP-BW, Business Objects or other enterprise business intelligence toolset. Must possess a strong sense of customer service and be able to talk to business users to gather requirements and understand the business needs. This candidate should be able to design and model creative solutions based on these requests.

Our implementation is ongoing so you will be involved with supporting and expanding the existing current SAP-FI and SAP-HCM based data warehouses. Several other BI technologies are maintained within the same group so there will be exposure to other platforms (Microsoft, Business Objects, Hyperion Essbase.)

3+ years of SAP BW/BI experience developing Business intelligence data models

* Willingness to mentor junior staff

* Strong conceptual, analytical and problem-solving abilities

* Well-organized and able to prioritize and coordinate simultaneous tasks and projects while addressing customer needs.

* Strong interpersonal and communication skills

* Project management experience helpful but not required

THIS POSITION REQUIRES A CRIMINAL/CREDIT BACKGROUND INVESTIGATION BEFORE OFFER.
