Title Oracle DBA -

Posted Date 8/31/2010

Right To Hire 6 Months

Job Description Maintaining, administering and ensuring the security and stability of the company's Oracle implementations. Analyzing, troubleshooting and resolving complex problems involving databases, operating systems and applications. Participation in the development, deployment and support of infrastructure and technology solutions, both from an architectural and operational perspective.

Skill Set Responsibilities:

- * Database installation, configuration, Critical Patch Updates, monitoring, maintenance and version upgrades
- * Work incident tickets including problem isolation, analysis, root cause, and solution
- * Provide technical support, on call and excellent customer service
- * Work closely with management, developers, project managers, technical staff and end-users to ensure successful project implementation and deliverables
- * Database solution design, performance monitoring, analysis and tuning
- * Capacity planning, space extent checks and extending database space
- * Backup and recovery (RMAN) and DR testing and planning
- * Develop, implement and enforce procedures, security policies, standards and best practices to support the operation of database systems
- * Ensure high availability and optimum performance of database systems
- * Standard database operations, daily checks, OEM
- * Exports, imports, reorgs, PL/SQL
- * Research and test new database technologies, share knowledge
- * Work towards automation and gaining efficiencies
- * Implementation and release of database changes
- * Perform database security audits and health checks

Qualifications:

- * 2+ years of Oracle DBA experience using Oracle 9i -11g, supporting large-scale production systems and providing technical expertise
- * Bachelor's degree in related field or equivalent work experience
- * Knowledge of Oracle RDBMS, Enterprise Manager, Data Guard
- * Experience with Oracle database management, administration, and maintenance
- * Experience with SQL programming, Backup/Recovery (RMAN) and Unix shell scripting (Unix, Solaris)
- * Performance tuning experience, including enabling and interpreting extended SQL tracing

Competencies:

- * Excellent interpersonal, written and oral communication skills
- * Ability to work independently and as a team member
- * Ability to manage and prioritize multiple assignments, projects and requests
- * Ability to be flexible and work analytically in a problem-solving environment
- * Excellent organizational and time-management skills
- * Self motivated, process/quality oriented with attention to detail
- * Results-oriented nature and a desire to provide excellent customer service
- * Strong research, analysis, problem solving and troubleshooting skills
- * Oracle certifications will be a plus
- * Programming experience in addition to the other experience is a plus
